INTELLIGENCE

Make Data-Driven Supplier Decisions

Gain actionable insights into your supply base to mitigate supply risk, and enable corporate sustainability and diversity.

Optimize manual processes and supplier expenditure

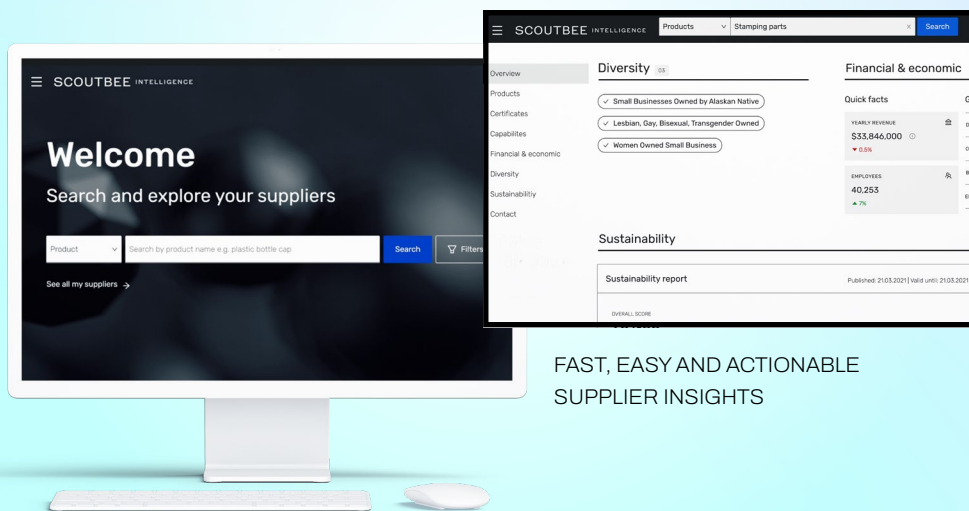

Enable **self-service** and give your procurement teams a clear and comprehensive picture of chosen suppliers by analyzing all accessible internal and external supplier information from **Scoutbee's data foundation of >10m suppliers**, and **AI-powered web crawlers**.

Accelerate supplier comparison and validation

With up-to-date supplier information, you can **protect yourself against supply disruptions, regulatory issues, and compliance risk**.

Organize your supplier base to drive innovation by combining data for deeper insights

Our **Intelligence data foundation and intuitive user interface** make it simple to establish necessary validation parameters like **diversity status, ESG, risk**, and other credentials to assist you in identifying suppliers' unique qualities.

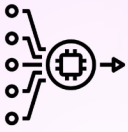

Do you have a consolidated view of up-to-date information on all your suppliers?

Using standard databases or spreadsheets can be time-consuming and can prevent you from accessing the most up-to-date supplier information. Out-of-date information can reduce data quality and engagement across your global supply base as it requires significant resources to complete without the necessary tools. **By holistically evaluating your supplier data, you can make informed supplier-related decisions while protecting your brand and mitigating supplier risk and disruption.**

Why SCOUTBEE Supplier Intelligence

SCOUTBEE Supplier Intelligence is a cutting-edge SaaS solution that helps organizations **identify qualified suppliers quickly and to obtain a 360-degree view of supplier information, performance, and risk**. It enriches supplier profiles with data from any internal system and combines data for deeper insights into metrics like certificates, diversity, environmental, and risk. Leverage our AI-powered platform to critically analyze sourcing prospects through data-driven product and supplier insights.

Boost the Effectiveness of your Supply Chain

Consolidate your supplier information into a single dynamic platform, ensuring that your data is always up-to-date, and develop the ability to effectively collaborate with your supply chain community.

- 1. Find the right supplier.** With the click of a button, you can quickly do keyword searches, as well as sophisticated filtered searches, using a number of criteria, such as products, certificates, capabilities, regions, countries, and many others.
- 2. Extensive data knowledge.** Make use of our high-quality data enrichment skills to combine your supplier data from multiple internal and external systems all in one place using supplier insight management.
- 3. Quickly look through various potential suppliers.** Our comparison feature enables users to find the most suitable supplier by selecting their own meaningful, most critical attributes for a comparative performance view.

Obtain a Comprehensive Supplier View to Ensure Supply Continuity

Gain a 360-degree view of all aspects of supplier information, including spend, contracts, sourcing, certificates, performance, and collaborative feedback by utilizing information from our data foundation, as well as internal and external data.

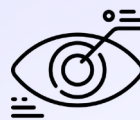

- 1. Obtain a dynamic supplier view to make well-informed decisions.** Make better procurement decisions by combining your current supplier data from many sources, such as your supplier data, Scoutbee supplier data, the internet, and verified third-party supplier data.
- 2. Create a resilient supply base.** Using the Scoutbee data foundation, enrich your supplier data with the most recent supplier information, giving you a more informed perspective on your current or potential suppliers.

Enrich your Supplier Data to Gain Additional Insights

Combine data for deeper insights into ESG, resilience, and innovation by enriching your supplier profiles with information from any internal or external systems.

- 1. Meet your supplier diversity goals.** Make use of our preconfigured algorithms to meet your diversity objectives by examining supplier profiles enhanced with various diversity labels.
- 2. Assess how suppliers meet your sustainability goals.** Review suppliers who will support your environmental objectives by examining ESG ratings and scorecards.
- 3. Reduce supply risk to reinforce the resilience of your supply base.** Enhance supplier validation, minimize risk, and increase adherence to corporate guidelines to create resilience in your supply chain.
- 4. Assist your R&D teams in locating the best supplier of new products.** Find suppliers for product innovations based on their product capabilities, ratings, and reviews.

Increase Visibility into your Supply Chain

Leverage our predictive analytics to combine data from ERP, SRM, and other data sources, such as quality, spend, and supplier risk, to aid in strategic decision making.

- 1. Stay informed to reduce your risk exposure.** Proactively manage supplier risk by combining real-time supplier data to detect hidden risks in your supply chain.
- 2. Monitor supplier performance.** By combining machine learning with a number of KPIs, you can validate your supplier data with comprehensive profiles through visualizations and insights.
